

DISPLAY BUS EXTENSION DALI2 EBDA2

Taric 8543709099

Certifications

Functional Specifications

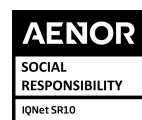

- Control Center
- Supply: 24Vdc 5.3W
- Charging time: 24 h

Mechanical and Aesthetic Specifications

- Insulation: Class II
- IP20
- Working temperature: -20 / 60 °C

DISPLAY BUS EXTENSION DALI2 EBDA2

Installation characteristics

Input Power supply: 24V DC
Output Power Supply: 24V DC
Output current: 300mA
Consumption: 5.3W
Mounting: DIN rail
Interface:
- 2 x RJ45 (Ethernet)

Operating characteristics

Allows to increase the number of DALI lines of the ZWEBDALI control panel.
Extends 3 independent lines (each with possibility of 64 devices and needing its own bus power supply)
Test button and status LED for DALI
- Flashing 5Hz, 50% on: test mode
- Flashing 2Hz, 5% on: error
- Flashing 2Hz, 90% on: in active mode
Testing the wiring with the test button:
A long pulse performs a test sequence on all luminaires connected to the DALI system. To exit the test mode, press the test button again.
